Boston, MA | sjoerdvink@icloud.com | [Website](#) | [LinkedIn](#) | [Github](#)

ACADEMIC DEGREES

- Utrecht University**, PhD in Computer Science 2024 - present
Advised by Michael Behrisch and Remco Chang
- Utrecht University**, MS in Data Science 2023 - 2024
- Utrecht University**, BS in Information Science 2020 - 2023
Exchange semester at University of Wisconsin-Madison (Fall 2022)

PROFESSIONAL EXPERIENCE

- Dutch Network for Academics in the US**, Board Member - Boston, MA (USA) September 2026 - present
- Engaged with senior academics and government stakeholders on research policy, academic cooperation, and transatlantic science priorities.
 - Contributed to strategic initiatives strengthening academic collaboration and knowledge exchange between the Netherlands and the United States.
- Hassoun Lab at Tufts University**, Researcher & Technical Advisor - Medford, MA (USA) May 2026 - present
- Led the design and implementation of a system for human-in-the-loop metabolomics classification.
 - Advised the lab on systems development, software infrastructure, and human-AI interaction for computational metabolomics research.
- Visual Analytics Lab at Tufts University**, Doctoral Researcher - Medford, MA (USA) September 2024 - present
- Investigated how representations and transformations mediate interaction between humans and AI systems.
 - Developed representations, and interaction techniques that structure how humans and computational systems express and manipulate information.
 - Designed and built interactive systems for exploring and steering complex representations and transformations, including high-dimensional, latent, and graph-structured spaces.
- GraphPolaris**, Software Engineer - Utrecht (Netherlands) April 2023 - April 2026
- Led the design and implementation of all AI features that combine model outputs with user input to support interactive analysis and decision-making.
 - Collaborated closely with enterprise clients (incl. Fortune 500) to identify user needs and translate them into product requirements, directly shaping the platform's development roadmap and enabling use cases with multi-million dollar cost savings.
 - Built and maintained 5 end-to-end ETL pipelines transforming fragmented data silos into unified datasets, enabling new analytical capabilities and more informed data-driven decisions.
- Tufts University**, Visiting Researcher - Medford, MA (USA) April 2024 - July 2024
- Conducted master thesis research on automated design and recommendation of visualizations.
- Freelance**, Software Engineer - Utrecht (Netherlands) 2020 - 2023
- Designed and developed full-stack web applications for clients, translating business requirements into systems.
 - Delivered and maintained production-ready solutions, ensuring reliability and usability for users.

HONORS

Best Paper Award , GRIVAPP 2026 – Graph Visualization Design Guidelines As Learnable Predicates	2026
The Next Web , Top 500 most talented people under the age of 30 in the field of technology.	2024

PUBLICATIONS

Conference / Symposium Publications

- [1] Vink, S., Li, S., Montambault, B., Behrisch, M., Li, M., & Chang, R. (2026). *ZipLine: Visual Analysis of Multivariate Graphs with Predicate Logic*. IEEE Transactions on Visualization and Computer Graphics.
- [2] Behrisch, M., Vink, S., Christino, L., & Chang, R. (2026). *GraphPolaris: A System for Query, Analysis, and Visualization of Graph Databases*. IEEE Transactions on Visualization and Computer Graphics.

Workshops / Posters / Abstracts / Theses

- [4] Vink, S., Christino, L., & Behrisch, M. (2026). *NodeSubstrates: Bridging Node-Link Diagrams with DR-Based Semantic Substrates*. EuroVis Workshop on Bridging Graph Drawing and Dimensionality Reduction.
- [5] Vink, S., Byungmoo, K., Brumar, C., Yang, M., Potter, K., & Chang, R. (2026). *Position Paper: The Strategic Opportunity for Visual Analytics in the Age of Generative AI*. EuroVis Workshop on Visual Analytics (EuroVA).

INVITED TALKS & LECTURES

Tufts University , AI-assisted software development (CS 178)	Spring 2026
Tufts University , An introduction to multivariate graph analytics (CS 178)	Spring 2026
Tufts University , An introduction to multivariate graph analytics (CS 178)	Spring 2025

VOLUNTEERING

Dutch Student Society Boston , Founder	2026 - present
Netherlands America Foundation , Events	2024 - present

ADVISING

Graduate Students

Chang He, Department of Computer Science, Utrecht University
MSc. thesis on Formal models for decision making with LLMs.

Jacob Kao, Department of Computer Science, Tufts University
MSc. thesis on Knowledge extraction from unstructured data for RAG purposes.

Undergraduate Students

Dorus Keijzer, Department of Computer Science, Utrecht University
BSc. thesis on Visualization recommendation for graph data structures.

ACADEMIC SERVICES

Teaching Assistant

Utrecht University, INFOB2WT Web Technology

Spring 2023

Reviewing

IEEE Visualization Conference

Spring 2026

OPEN-SOURCE SOFTWARE AND CONTRIBUTIONS

Mellea , Mellea is a library for writing generative programs from IBM.

WeaveMind , A programming language for AI systems.

ZipLine , Visual analytics system for analyzing multivariate graphs using predicate logic.

LANGUAGES

Dutch (native), English (fluent)
